RE: Reclamation Work

Dear Jerry:

This is to advise you that the dirt work and seeding has been completed for the two reclamation projects included in the condition for mining of our Black Springs Mine in Millard County, Utah.

Dirt work for both locations was completed in August and September with a total of 83 dozer hours. Metal signage was removed and the ingress/egress roads were ripped by the dozer as well.

Seeding on the project was done on October 20th and 21st 2005 using the seed mix shown on the attachment and discussed with Harvey Gates. Following seeding the area was lightly covered with the small drag harrow.

I have included a few pictures of the area following planting as well as pit outlines created prior to reclamation using GPS data.

These two areas will be monitored for growth but will not be considered for reseeding if necessary until fall 2008.

Regards,

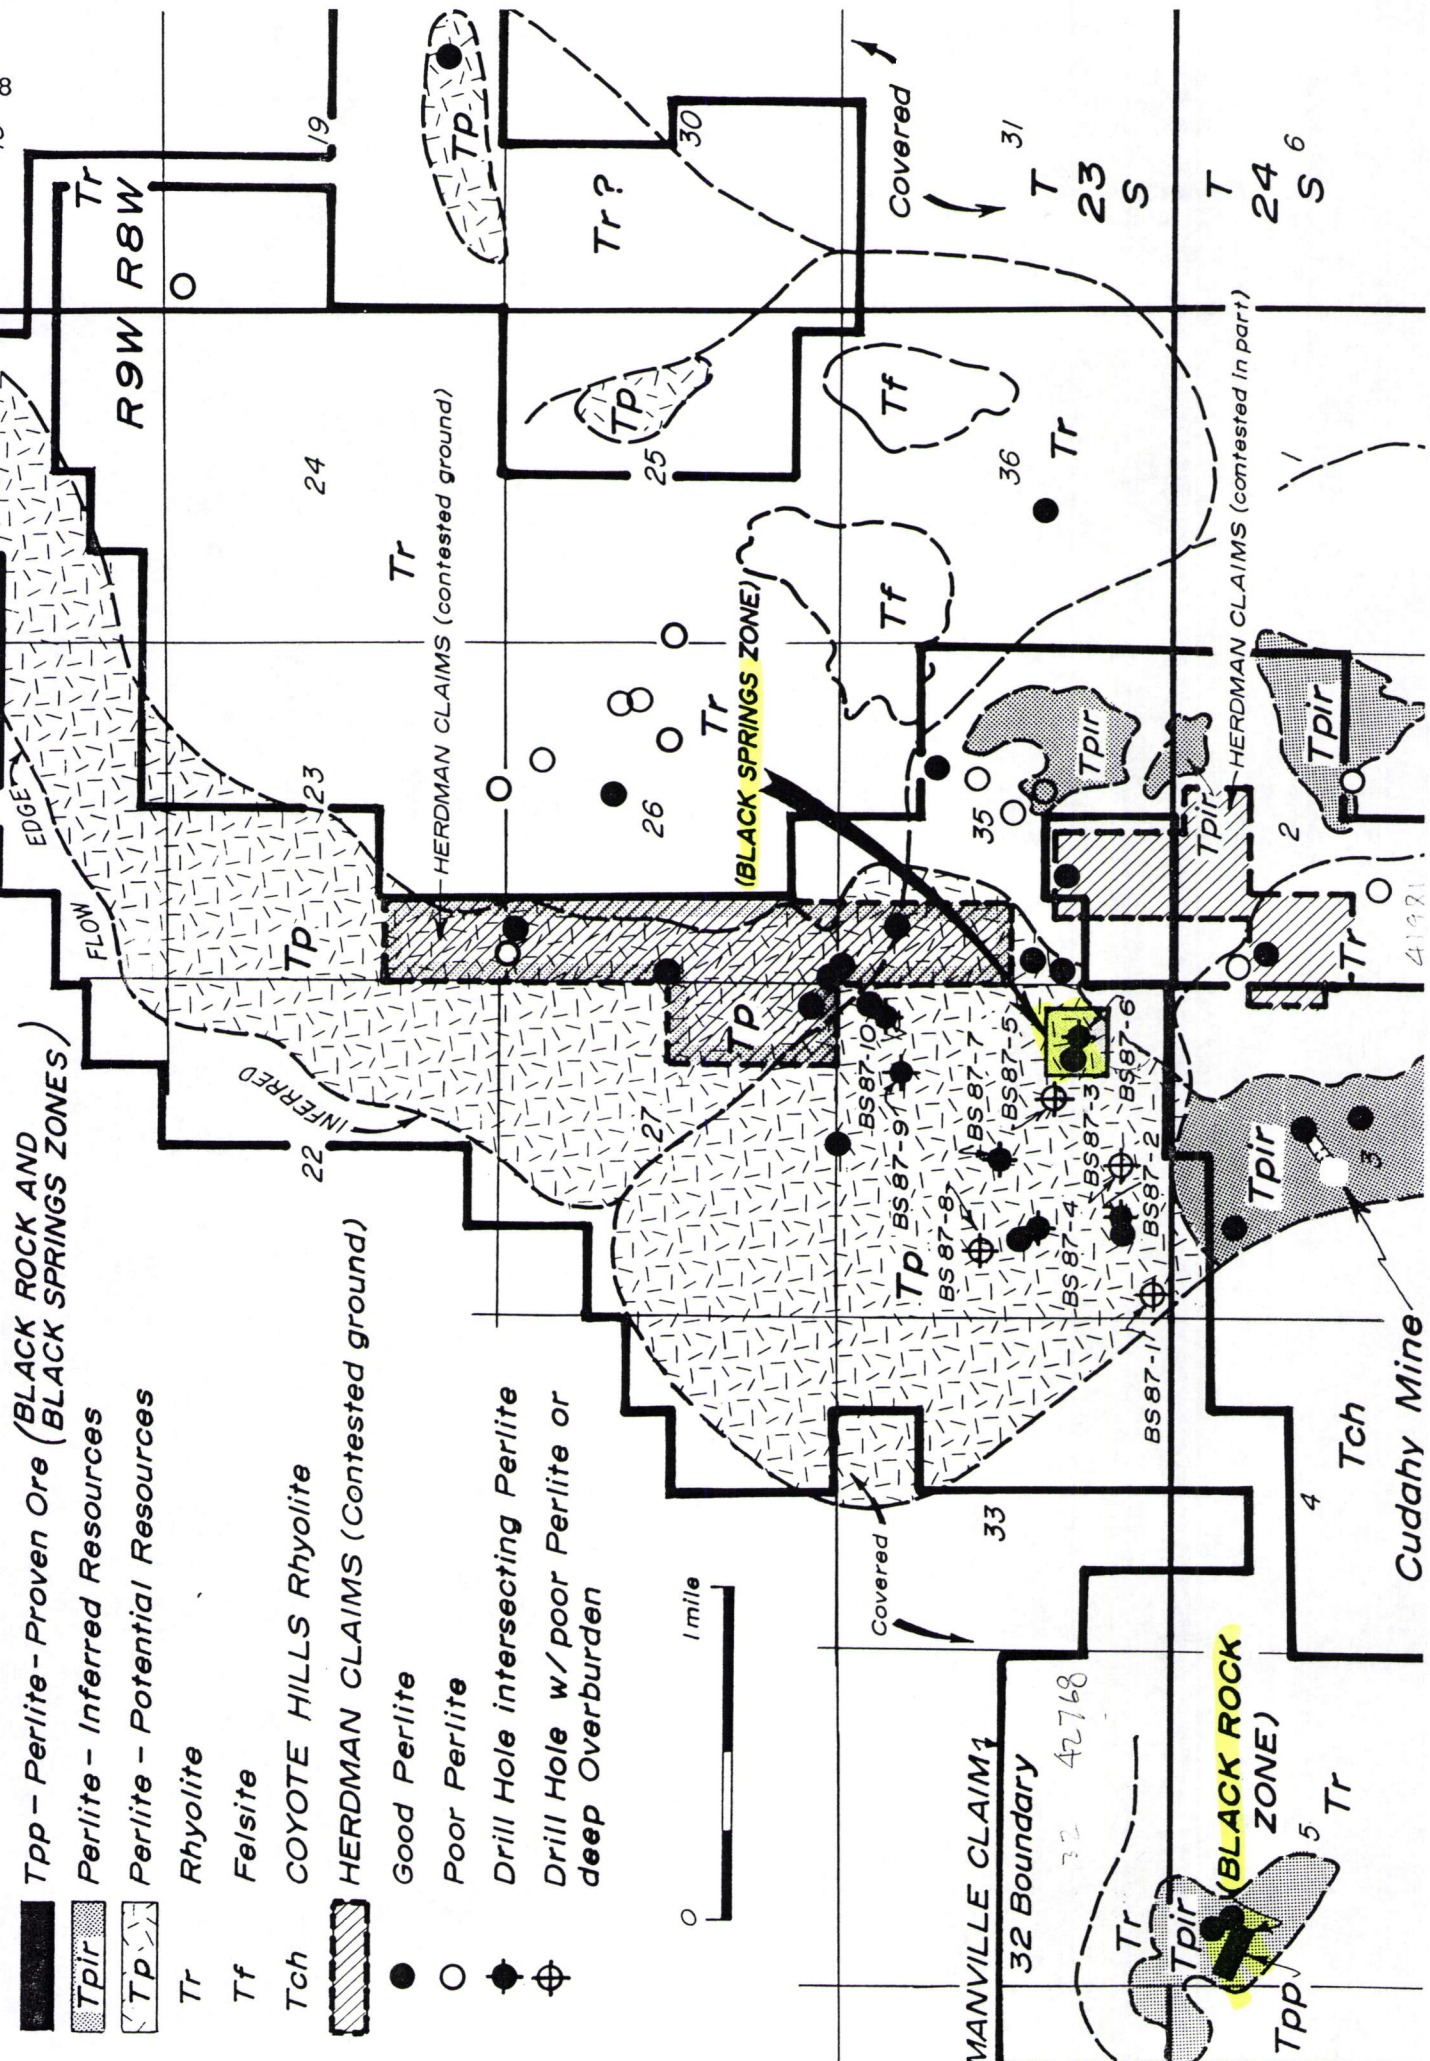

Jonna True
Mine Planning Coordinator

A hand-drawn diagram of an irregular polygon representing a reclamation site. The polygon is drawn with a black line. Inside the polygon, there is text in red and blue. Outside the polygon, there are two blue lines pointing towards the bottom-left corner, labeled 'Road into Pit'. Another blue label 'Back side of pit toward Twin Peaks Road' is located near the top-right edge of the polygon.
